RE: Riverview Industrial Center, Clark Properties

Dear Mr. Barton:

Please find enclosed the site blueprint for the Riverview Industrial Center at 9215 Riverview Dr., St. Louis, MO, formerly owned by GAF. The locations of four underground storage tanks, as indicated by the blueprint, have been highlighted in yellow. In addition to the underground tanks, an above ground tank is also shown, however it has been removed according to Mr. Harold Clark of Clark Properties.

Regarding the asbestos waste pile located at the site, Missouri Department of Natural Resources (MoDNR) considers the pile to be stabilized. Mr. Dan Bennett of the St. Louis Regional office of MoDNR stated that no action was pending.

MoDNR was also contacted concerning compliance with the Resource Conservation and Recovery Act. Mr. Tom Judge of the Enforcement Division at the Jefferson City office stated that the MoDNR currently has no enforcement action pending in regards to the Riverview Industrial Center.

Please contact me should you have any further questions in this matter.

Sincerely,

METCALF AND ASSOCIATES

Karen Acker
